

Rodrigo Figueroa

AI-Native Engineer & Senior React Native Engineer

Chile | [LinkedIn](#) | [GitHub](#) | [X](#) | [Calendar](#)

AI-native engineer and senior React Native developer with 10+ years shipping production software. Recently built and launched AI-powered products combining agent chat infrastructure with computer use.

EXPERIENCE

Founder & AI Engineer

Jun 2026 — Aug 2026

StorySeam

Remote

Built an AI video product where an agent transforms a text premise into a finished visual story in minutes. Ran the agent on Cloudflare using the Agents SDK and Flue SDK, generated media through Fal.ai integration, and executed workloads in Daytona sandboxes.

Founder & AI Engineer

Mar 2026 — May 2026

Inti

Remote

Built a cloud computer for agents combining agent chat infrastructure with computer use. Wrote a custom web terminal running Ghostty in the browser with the herdr multiplexer. Ran iOS simulators in the cloud using native-sim, an open-source project released during this period. Received startup program funding from both Daytona and E2B sandbox providers.

Founder & AI Engineer

Jan 2026 — Present

React Native Feel

Remote

Run a subscription suite of production-ready React Native SDKs and codebases including /chat for AI chatbots with streaming, tools, voice and attachments, and /deploy for automated EAS builds and store submissions. Also maintain Gpt Live, Sim cloud iOS simulator, Local AI, AI Photo Editor, Video Editor, Companion and Chun UI design system.

Creator & Maintainer

Dec 2025 — Feb 2026

React Native Vibe Code

Remote

Built the first open-source mobile vibe coding platform where users describe an app in chat and get React Native apps generated and run in cloud sandboxes. Designed the underlying agent chat and sandbox infrastructure.

Indie Mobile Developer

Dec 2025 — May 2026

Self-employed

Remote

Launched two apps on the App Store. AI Photo Edit removes arms from selfies, fixes blinks and eye contact, and applies custom edits. Tandem is a planning app for couples with shared calendar, fair chore lists, real-time grocery list and monetized through subscriptions.

React Native Software Engineer

Aug 2025 — Oct 2026

Capsule

Remote

Built an AI product that converts text into mobile and web apps in seconds. Users chat in plain language and receive working iOS, Android and web applications generated on demand.

Professional development

Jul 2025 — Present

Career Break

Expand beyond programing into learning product development and growth strategies beyond mobile development.

React Native Software Engineer

Apr 2025 — Nov 2025

AGI, Inc.

Hybrid

Built React Native prototypes for consumer apps combining new agentic AI technology with mobile platforms.

React Native Engineer

Apr 2025 — Jun 2025

theagi.company

San Francisco Bay Area

React Native mobile app development for agentic chat experiences

React Native Software Engineer

Feb 2025 — Present

Expo AI Chatbot

Expo AI Chatbot is the fastest way to create React Native AI Chatbot apps. First project of it's kind blending Expo and AI. With a free OSS version and Paid plans with more features.

Contract Work

Feb 2025 — Present

React Native Software Engineer

Remote

Created Expo AI Chatbot, the first open-source project combining Expo with AI for building React Native chatbot apps. Ran both free open-source and paid plans with additional features. Built React Native prototypes for AGI, Inc. combining agentic AI technology with mobile consumer apps.

React Native Software Engineer

Sep 2024 — Nov 2025

Blankity

Remote

Built the iOS app and Next.js frontend for a flashcard learning platform where content creators build and sell learning packs. Project was not released following the loss of a founding member.

React Native Software Engineer

May 2024 — Present

Tamagui LLC

Remote

Delivered the release of the Bento UI component suite, making every component universal across iOS, Android and web. Built bento-get, an npx CLI for searching and installing components from the terminal with GitHub authentication. Overhauled the Takeout Pro starter template with new features and upgraded to the latest Expo SDK.

Mobile Engineer

Jun 2022 — Apr 2024

Vector Solutions

Remote

Built and maintained React Native mobile apps for production use.

Frontend Engineer

Nov 2021 — May 2022

Rally

Remote

Frontend development work for a web platform.

Senior Software Application Engineer

Mar 2020 — Nov 2021

ResiDesk

Las Condes, Santiago Metropolitan Region, Chile

Senior role building and architecting software applications.

Full Stack Developer

Feb 2019 — Mar 2020

Educaswitch

Santiago Metropolitan Area

Full stack development for an education platform.

Full Stack Developer

Oct 2018 — Feb 2019

Haip

Provincia de Santiago, Santiago Metropolitan Region, Chile

Full stack development work.

Full Stack Developer

May 2016 — Jul 2018

CrazyCake Technologies

Santiago, Chile

Full stack development for web and mobile applications.

Full Stack Developer

Jan 2015 — Apr 2016

Build and Create

Renato Zanelli 1321 Providencia

Software Developer

Sep 2014 — Dec 2014

The Flatiron School

New York City Metropolitan Area

Full Stack Web immersive Development

Founder / Web Software Developer

Jun 2012 — May 2013

Colaborative

Santiago de Chile

Founder. In charge of digital developments, and also part of the creative team for digital experiences.

Founder / Web Software Developer

Jan 2011 — Jan 2012

WECLAP Ltda.

Chile

Founder. In Charge of digital developments, and also part of the creative team for digital experiences.

EDUCATION

Flatiron School

Jan 2014 — Jan 2014

Backend Developer in Ruby, Rails, OOD, GIT, Github, javascript, jquery, Rspec

Primer Chileno egresado de la escuela.

Universidad del Desarrollo

Jan 2006 — Jan 2008

Publicidad

PROJECTS

Universal Medusa

Multi platform e-commerce development using React Native + Next.js + Medusa.js

Cloud computer for agents with computer use capabilities, Inti

Built a cloud computer combining agent chat infrastructure with computer use. Created a custom web terminal running Ghostty in the browser with the herdr multiplexer. Deployed iOS simulators in the cloud using native-sim, an open-source project.

AI video product that generates visual stories from text premises, StorySeam

Built an AI agent that turns a text premise into a finished visual story in minutes. Ran the agent on Cloudflare using the Agents SDK and Flue SDK, generated media through Fal.ai, and executed workloads in Daytona sandboxes.

First open-source mobile vibe coding platform, React Native Vibe Code

Built a platform where users describe an app in chat and get React Native apps generated and run in cloud sandboxes. Designed the agent chat and sandbox infrastructure from scratch.

Production-ready React Native AI chatbot framework, Expo AI Chatbot

Created the fastest way to build React Native AI chatbot apps, the first project combining Expo with AI chatbots. Offered as both free open-source and paid versions with premium features.

AI photo editor for selfie enhancement, AI Photo Edit: Remove the Arm

Built an AI photo editor that removes arms from selfies, fixes blinks and eye contact, repositions camera angles, and applies custom prompt-based edits. Released on the App Store.

Planning app for couples with shared calendar and chores, Tandem: Couple Sync

Built a planning app for couples featuring shared calendar, fair chore lists, real-time shared grocery list, notifications and invite-code pairing. Monetized through Tandem Pro subscriptions.

Universal React Native component suite, Bento UI

Delivered the release of the Bento UI component suite making every component universal across iOS, Android and web platforms. Maintained and upgraded the suite with new features.

CLI tool for searching and installing UI components, bento-get

Built an npx CLI for searching and installing components from the terminal with GitHub authentication integration for seamless component discovery and installation.
