

Nicolás F.

Laravel Backend Developer

Mendoza, Argentina | [LinkedIn](#)

Backend developer with over a decade of experience creating Laravel-based APIs for diverse business sectors.

EXPERIENCE

Back End Developer

CodingIT

Jun 2025 — Present

Argentina

Back End Developer

Babio

Sep 2024 — May 2025

Spain

Worked on a solar panel SaaS platform that handled the entire sales lifecycle, from generating proposals to closing deals.

Designed and built scalable backend systems to support a high volume of users and data.

Wrote automated tests to catch bugs early and ensure stable feature updates.

Integrated external services and APIs, such as CRMs and finance tools.

Laravel Backend Developer

TusClicks

Jul 2021 — Aug 2024

Migrated legacy Laravel projects to modern PHP and Laravel versions.

Optimized performance by implementing queues for background processing and introducing effective caching strategies.

Back End Developer

Coding Ways

Nov 2013 — Jun 2021

Mendoza

Recruited, managed, and led a team of 6-10 people for over 6 years.

Led backend API development using Laravel.

Contributed to diverse backend projects for international clients.

Backend Developer

Centric Digital LLC

May 2012 — Sep 2013

New York, United States

Built an online CV generator for careersdonewrite.com.

Contributed to the Shopify integration for shop.andrewmcmahon.com.

Worked on several internal tools, including reporting, statistics, and KPIs.

Developer - IT Support

Copeland

May 2010 — Aug 2011

Boise, Idaho Area

Worked as a Software Developer and IT Support at Paksense Argentina (now Copeland).

Developed the backend for the web-based Paksense Ultra software.

Assisted customers with hardware and software issues.

Modified and maintained the Paksense software and database.

Customized the software for specific clients.
