

Hans Y.

Ecosystem Product Manager

Remote | [LinkedIn](#) | [hansy.me](#) | [github.com/hansy](#)

Product-focused engineer exploring what new technology makes possible, with experience building developer tools, APIs, and consumer apps across Web3, education, and gaming.

EXPERIENCE

Ecosystem Product Manager · Grants Lead

Jan 2021 — Present

Livepeer

Remote

Observed developers building with the Livepeer API to identify friction points and surface issues to engineering. Led a grants program to find, fund, and support prospective Livepeer adopters, building internal tooling for vetting, milestone verification, and payments. Ran experiments and built prototypes with Livepeer partners.

Product Engineer · Product Manager

Jan 2019 — Mar 2020

Lincoln Network

Remote

Led a client's online textbook product including content API development and building peer-to-peer iOS and Android apps with offline functionality. Built tools and APIs for other clients and led internal engineering hiring.

Product Engineer · Product Manager

Jan 2015 — Jan 2017

Lincoln Network

Remote

Led a client's online textbook product including content API work and building peer-to-peer iOS and Android apps with offline capabilities. Built tools and APIs for other clients and led internal engineering hiring.

Founder · Consultant · Product Manager

Jan 2012 — Jan 2015

Various

Remote

Founded Rippld, Distribb, and VocalTap. Consulted with Catelo Labs and Tripbright on product strategy and engineering.

EDUCATION

University of Michigan

B.S. Neuroscience, Economics

PROJECTS

ChatGPT for board game rules, more accurate, Magister

A tool that uses AI to answer questions about board game rules with higher accuracy than existing solutions.

Open-source browser-based multiplayer tabletop for Magic: The Gathering, Drawspell

An open-source, browser-based multiplayer tabletop game client for playing Magic: The Gathering.

Personalized home for discovering and reading independent comics, The Funnies

A platform for discovering and reading independent comics with personalized recommendations.

SKILLS

product management · API design · iOS development · Android development · Web3 · developer relations · startup building · grants management · offline-first applications
