

Edan Harr

Senior Data Analyst / AI Developer

Remote | [LinkedIn](#) | [GitHub](#)

Data analyst and AI developer with 7+ years building enterprise analytics, ETL pipelines, and production AI systems—experienced deploying agentic AI at scale across 14 organizations and supporting multi-billion-dollar compensation programs.

EXPERIENCE

Fractional CTO, Data & AI wAIwiser	Jul 2025 — Present <i>Remote</i>
Designed and operate production agentic AI workflows across 14 client organizations managing 48,000 agents, with Langfuse and GenOS tracing and monitoring to maintain reliability in live operations. Replaced manual scheduling processes with AI-driven workflows, built automated variance detection across retail inventory systems, and stress-tested data standardization across retail, manufacturing, agriculture, construction, and aviation environments.	
Lead Data Analyst CBRE	Apr 2025 — Jul 2025 <i>Remote</i>
Led enterprise data-standardization initiative consolidating fragmented contract data from spreadsheets and internal tools into centralized management system. Designed repeatable data-structuring and validation methods using Excel, ETL, regex, and document parsing while partnering with client teams on requirements and data integrity.	
Lead Data Analyst & AI Consultant Intel	Sep 2023 — Mar 2025 <i>Remote</i>
Built interconnected Power Apps used by 60+ managers overseeing commission employees, integrated 400+ daily-refreshed SharePoint records with role-based access, and engineered Power Automate ETL workflows for automated stakeholder notifications. Created Power BI dashboards with advanced DAX and M queries for health metrics and executive reporting, executed multi-billion-dollar pay audits, and developed GPT-4 document-analysis applications with HTML/CSS/JavaScript.	
Accounting Analyst JB Dewar	Feb 2023 — Aug 2023 <i>Remote</i>
Managed accounts payable workflows and transformed unstructured financial data into standardized accounting formats for invoice processing. Reconciled vendor accounts using Excel lookups and PivotTables while establishing data-quality audits and governance controls.	
AI Chatbot Developer Visual Analytics Sciences	Dec 2016 — Jan 2023 <i>Remote</i>
Started as intern and advanced to full-time developer role owning client conversational AI builds. Built IVR and conversational AI applications in Voiceflow for order processing and insurance lead qualification, developed natural-language-to-SQL chatbot enabling database queries through conversation, and created Tableau performance dashboards with data preparation using Tableau Prep and Alteryx.	

EDUCATION

<i>Tableau Certification</i>	Jan 2022 — Present
Cuesta College <i>Associate of Computer Science</i>	

SKILLS

SQL · Power BI · DAX · M · Tableau · Tableau Prep · Alteryx · Metabase · Excel · Power Query · Python · ETL · Data standardization · Data governance · Ad hoc analysis · OpenAI · Anthropic · Azure AI Services · Microsoft Copilot Studio · Azure Bot Framework · Langfuse · GenOS · Prompt engineering · LLM evaluation · NLP/NLU · Speech-to-text · Text-to-speech · Power Apps · Power Automate · JavaScript · TypeScript · React · HTML/CSS · REST APIs · JSON · n8n · Make.com · Git · GitHub Copilot · VS Code · Voiceflow · Dialogflow CX · Twilio · ManyChat · IVR · Conversation design · Natural-language-to-SQL interfaces
