

Brian T.

AI Product Builder and Founder

London, United Kingdom | [LinkedIn](#) | [Website](#)

I turn commercial problems into investment decisions and working products. At Radiant Management Systems, I build consumer apps for focus, training and wellbeing. At Sandbox Group, I evaluate acquisitions, model transactions and build tools for the deal team—including an acquisition CRM used by three colleagues. Previously, I founded Kiroku Notes, an AI learning platform, and raised US\$100k at a US\$2m valuation. I study data science, machine learning and interdisciplinary problem solving at LIS and have passed CFA Level I.

EXPERIENCE

Co-Founder and CEO May 2026 — Present
Radiant Management Systems *London, UK*
Building and shipping consumer apps including Prayer First (Bible-led focus and app blocking), TriElite (triathlon training), and Unknot (guided stretching). Leading product direction and AI-assisted development across onboarding, core experiences, subscription flows and releases using React Native, TypeScript and native SwiftUI.

Independent Corp Dev Consultant Mar 2026 — May 2026
PCG Power *Guangzhou*
Contributed to due diligence and investor materials for cross-border solar-energy expansion. Analysed opportunities in the context of geopolitical constraints and helped translate research into materials for funding discussions.

Private Debt Intern Jul 2025 — Aug 2025
Tikehau Capital *Singapore*
Supported due diligence on potential private-debt investments, assessing market potential, financial health and downside risk. Prepared information memoranda to communicate investment findings.

Co-Founder & CEO Feb 2025 — Jun 2026
Kiroku Notes *Singapore*
Founded an AI learning platform combining spaced repetition, adaptive difficulty and gamified progression. Raised US\$100k in pre-seed funding at a US\$2m valuation, leading investor sourcing, pitching, financial modelling and term negotiation.

Corporate Development Associate Nov 2024 — Present
Sandbox Group *London Area, United Kingdom*
Built an internal acquisition CRM using Codex and Claude for three corporate-development colleagues supporting outbound sourcing. Translated the deal team's sourcing and opportunity-management workflow into working software to complement the existing inbound process.

Analyst Intern Aug 2024 — Sep 2024
GenInnov Fund *Singapore*
Analysed 15 AI-related companies across competitive positioning, financial performance and growth strategy. Contributed to preliminary portfolio-risk modelling using principal-component analysis with an AI interpretation layer.

3rd Sergeant, Company Quartermaster and Section Commander Sep 2022 — Jul 2024
9th Division, Singapore Armed Forces *Pulau Tekong*
Managed food and supplies for approximately 1,500 soldiers and trained approximately 80 recruits. Held leadership roles in logistics and personnel management within the 9th Division.

Public Policy Intern Dec 2020 — Jul 2021
Sea Group *Singapore*
Monitored macroeconomic developments and drafted management speaking points for external events including the FT Global Boardroom.

Assistant Youth Football Coach Dec 2020 — Jul 2021
Lion City Sailors FC *Singapore*
Assisted in football coaching for <10 year olds

EDUCATION

London Interdisciplinary School Sep 2024 — Present
Bachelor of Arts and Sciences, Interdisciplinary Problem Solving
Current grade: First Class.

Interdisciplinary degree focused on solving real-world problems using quantitative and qualitative methods. Coursework includes data science, machine learning, natural language processing, economics and law.

Apply this approach across commercial research, AI-enabled learning and software building: connect technical evidence with human behaviour, incentives and practical decisions.

Hwa Chong Institution

Jan 2016 — Oct 2020

Attended Hwa Chong Institution from 2016 to 2020.

PROJECTS

Shipped apps for focus, endurance training and wellbeing, Radiant — Consumer App Portfolio (<https://apps.apple.com/ca/developer/radiant-management-systems-pte-ltd/id6777431789>) May 2026 — Present
Building a portfolio of consumer apps at Radiant Management Systems, where I am Co-Founder & CEO.

Prayer First helps users put Bible time and intentional habits before distracting apps. TriElite helps triathletes organise training across swim, bike and run. Unknot guides stretching and mobility routines.

The common thread is turning a recurring user problem into a clear, practical product. My work combines product direction and hands-on building, with iteration across the app experience and launch process. The live App Store portfolio is linked above.

Spaced repetition, adaptive difficulty and gamified learning, Kiroku Notes — AI Learning Platform Feb 2025 — Jun 2026

Founded an AI-enabled learning platform designed around spaced repetition, adaptive difficulty and gamified progression. Explored how behavioural design can improve motivation, consistency and long-term retention.

Raised US\$100k in pre-seed funding at a US\$2m valuation, leading investor sourcing, pitching, financial modelling, term negotiation and closing coordination. Owned company strategy, hiring and relationships with investors and partners.

This combined product development with the commercial work required to turn an early idea into a funded venture.

From corporate-development workflow to working software, Sandbox Acquisition CRM

Built an internal deal-management platform for Sandbox Group using Codex and Claude. The platform is used by three corporate-development colleagues to support outbound acquisition sourcing alongside the existing inbound, founder-led process.

The project brought my commercial and technical work together: translating the needs of an M&A team into a practical tool for sourcing and managing opportunities. It is a concrete example of using AI to build software around a real operating workflow.

Textile Waste in Ghana

Collaborated with the Founder of IE Collective to analyze the textile waste crisis in Ghana through data science, legal, and political frameworks. Developed interdisciplinary strategies to address the issue and explore sustainable solutions.

Inequality in Mental Health Support

Collaborated with the Founder & CEO of Thinking Black to analyze inequalities in mental health support through economic, political, and neuroscientific lenses. Developed strategies to address these disparities by integrating interdisciplinary research and policy solutions.

CERTIFICATIONS

CFA Program Level I — Passed, CFA Institute Oct 2025

Best Soldier of the Month, Singapore Armed Forces Feb 2024

Personal Trainer Certification, National Council on Strength & Fitness - NCSF Jan 2021

Social Psychology, Wesleyan University Apr 2020

First Aid, St John Ambulance Aug 2017

President Ong Teng Cheong Leadership Award (2020),

CPR (CPR), Singapore Armed Forces
